

AMENDMENTS TO THE CLAIMS:

1 (Cancelled):

2 (Cancelled):

3 (Cancelled):

4 (Cancelled):

5 (Currently amended): A foot rest structure for a child's restraining seat comprising base means for supporting said restraining seat on a car seat, said base means ~~and~~ having a car seat contact plane, first shoulder structure ~~means~~ on a forward portion of said base means, platform means on said forward portion and having a foot support portion and a leg structure for positioning said foot support portion relative to said base means, said leg structure having an adjustment slot slots and second shoulder means structure adapted to be nested with said first shoulder means structure, said foot support position portion being disposed at a generally right angle to said leg portions structure, and clamping means structure contacting said leg portions structure and said base means and when tightened functioning to maintaining the position of said platform means relative to said contact plane by forcing said first and second shoulder means into

nesting contact once the height adjustment of said foot support portion has been made.

6 (Currently amended): The structure of claim 5 wherein said clamping ~~means~~ structure has tightening studs passing thru each said slot and around which said leg ~~portions~~ structure can pivot when said clamping ~~means~~ structure is loosened, whereby said foot support portion can be positioned as to height with respect to said contact plane as well as rotated downwardly toward the front of ~~a~~^{the} car seat thereby allowing a child's legs to dangle as desired for comfort.

7(Original): The structure of claim 5 wherein said base means comprises the floor of a conventional child's restraining seat.
